 Buyer data checklist
 Order to cash EDI savings

The **GS1 Australia Savings Calculator** is a tool to assist companies identify potential savings through implementing GS1 standards.

Use this checklist to collect information to generate your Savings Calculator report.

Ordering process

The implementation of electronic purchase orders will greatly reduce your order processing time, compared to manual ordering.

1	Number of normal orders you typically send per year	
2	Percentage of these orders that are disputed	
3	Number of emergency/non-scheduled orders you typically send per year	
4	Percentage of orders you think you will send using electronic messaging (EDI)	

Receipt of delivery process

Receipt processing time is greatly reduced when the Advanced Shipping Notice (ASN)/Despatch Advice is sent prior to receiving a supplier delivery.

1	Number of normal deliveries you typically receive per year	
2	Percentage of these deliveries that are disputed	
3	Number of emergency/non-scheduled deliveries you typically receive per year	
4	Percentage of deliveries you will receive with an electronic Advanced Shipping Notice/Despatch Advice (ASN/DESADV)	

Delivery confirmation process

Electronic delivery confirmation enables immediate confirmation of received deliveries, removing the need to raise manual notifications and documentation.

1	Number of normal deliveries you typically receive per year	
2	Percentage of these deliveries that include discrepancies	
3	Percentage of deliveries that require proof of delivery	

Payment process

Electronically receiving invoices greatly reduces manual processing times leading to improved Accounts Payable efficiencies.

1	Number of invoices you typically receive and process per year	
2	Percentage of these invoices that are disputed	
3	Percentage of invoices you anticipate receiving via electronic messaging
